Summary

I am a fresh Computer Engineering graduate from Asia Pacific University (APU), with a strong foundation in software development, design, and machine learning. Throughout my academic journey, I developed a passion for innovation, problem-solving, and hands-on technical projects, enabling me to build intelligent systems, secure applications, and creative digital solutions. I am now seeking challenging and rewarding entry-level opportunities whether onsite, hybrid, or remote where I can apply my technical skills and contribute meaningfully to innovative projects in software engineering, AI/ML, or web development.

Education

Asia Pacific University of Technology and Innovation (APU), Kuala Lumpur, Malaysia

Bachelor of Computer Engineering (Honors) - Expected: Sep 2025

De Montfort University (DMU), UK *Awarded via APU Partnership*

Master of Engineering To be awarded: Jan 2025

Skills

- **Languages:** Python, C++, Java, C, JavaScript
- **Frameworks & Libraries:** Django, Flask, PyTorch, TensorFlow/Keras, MediaPipe, PyAutoGUI, Flask-SocketIO, fernet fields, bleach, django-allauth, django-axes,.djangosimple-captcha, Pillow
- **AI, ML, and Computer Vision:** Vision Transformer (ViT), Image Classification, Object Detection, Model Training & Evaluation, ONNX, Real-time Inference
- **Web Technologies:** HTML, CSS, REST APIs
- **Databases & Tools:** Git, Docker, SQL (PostgreSQL, MySQL), Windows, CAD Software (SolidWorks), 3D Printing

Experience

Engineer Intern, June 2024 – Sep 2024

CREDIT Lab, Asia Pacific University, Kuala Lumpur, Malaysia

- Contributed to the design and development lifecycle of robotic systems, focusing on physical component design and functional programming.
- Assisted in designing robot body components using SolidWorks and monitored the 3D printing process.
- Play a key role in mapping the robot's movements, contributing to its overall functionality.
- Supported web development initiatives using Wix.

Projects

Palm Oil Fruit Ripeness Classifier:

GitHub: https://github.com/Owono2001/AI_Camera_Model

- Developed a Vision Transformer (ViT) based AI model (PyTorch) for classifying palm oil fruit ripeness (99.96% validation accuracy).
- Engineered for real-time inference and Raspberry Pi deployment considerations. Exported to ONNX.
- *Technologies:* Python, PyTorch, ViT, OpenCV, ONNX, Raspberry Pi.

My Personal Ecommerce (Secure Django Shop):

GitHub: <https://github.com/Owono2001/secure-django-shop>

- Built a multi-role e-commerce platform (Django) prioritizing robust security features (encryption, validation, rate limiting, auth, CAPTCHA, CSRF, RBAC).
- Developed core e-commerce functionalities and dynamic theming.
- *Technologies:* Python, Django, HTML, CSS, JS, fernet fields, bleach, django-axes, djangosimple-captcha, django-allauth, PostgreSQL, Celery.

Gesture Control Web Application:

GitHub: <https://github.com/Owono2001/Gesture-Control-Web-App>

- Created a web application (Flask, MediaPipe) for real-time hand gesture recognition via webcam to control system actions (PyAutoGUI).
- Developed interactive dashboard with live feed (Flask-SocketIO).
- *Technologies:* Python, Flask, MediaPipe, OpenCV, PyAutoGUI, Flask-SocketIO, HTML, CSS, JS, Docker.

Languages

- **Spanish:** Native
- **English:** Professional Working Proficiency

- **French:** Limited Working Proficiency

Interests

Actively seeking opportunities to contribute to open-source projects. Committed to a healthy lifestyle (gym, basketball). Enjoy creativity through content creation, music production, and audio/video editing.
